Subject: Re: Question -- FW: [WARNING : MESSAGE ENCRYPTED]

Ms. Chow,

→ The incomplete vehicle is a trailer. We would manufacture the complete trailer, and send it to a company that manufactures baler. They would install a baler onto the trailer. The baler would be fixed so it could be transported from site to site.

I have attached a picture to give you a better illustration.

What type of Incomplete Vehicles are you making? Are they trailers or trucks? Are you making these incomplete vehicles and then passing them to another mfr to work on?

We need to know the answers in order to further guide you on the federal requirements. Thanks.
